Inspected:

Written Report Received: 9/29/2015

Clean Up Concluded: 12/31/2012

Risk Evaluation:

Areal Extent:

Potential Environmental Impacts:

Action Taken or Planned:

On december 28, 2012 I received a call about a spill at the Mandaree 12-07H. I went to the site and saw oil on the ground inside the treater building and the bermed area around the treater. There was also a fine misting of oil that traveled to the E/SE off the facility pad. The mist did not appear heavy and did not appear to have traveled very far. The treater berm appeared to have caught most of the spray. Earthmovers of Minot was called and will be onsite today, 12/29/2012, to remove the contaminated soil and snow. The soil will be hauled to Clean Harbors and the snow will be melted in an open top tank.

Wastes Disposal Location: Clean Harbors

Agencies Involved:

Updates

Date: 12/30/2012 ***Status:*** Reviewed - Assigned to Other Agency
